

ROSSELLI

Rosselli introduces a new era of five-star opulence enclosed within the walls of Valletta, Malta's elegant capital city that glows a gradient of gold hues, the city's founder proclaimed that it should be 'a city built by gentlemen for gentlemen'. This certainly rings true for Rosselli, the first five-star hotel to open within the historic city bastions.

A meticulously restored 17th-century palazzo, blending the original baroque features with new contemporary touches. With a fusion of colours, textures and architectural motifs, Rosselli incorporates the classical lines of Renaissance architecture with early Baroque styles for a highly distinguished finish. One of the most striking parts of the property where this is conveyed is in the ground floor courtyard which has been expertly

restored, today it can be savoured as a calming place, away from the fast-paced pavements of the surrounding city.

Rosselli has the vision to raise the bar for high-quality travel experiences within the centre of the city whilst elevating the city's reputation within the realm of luxury travel. This concept can be found across the 25 designer rooms falling across six categories, centred around space and comfort whilst exuding luxurious touchpoints from Valletta's rich cultural past.

The past and present meet as one at Rosselli. A place where time slows to a serene standstill, facilities at guests' fingertips, include everything the luxury traveller would expect for a sophisticated city escape. Exceptional service ties each of the facilities together for an experience exceeding all others within the city. From the elegant rooftop bar, lounge and Under-Grain, a One Star Michelin restaurant, inspired by the heritage of the building, encouraging those who step inside to leave the stresses of daily life behind and to indulge among the seamless pleasures available.

Intuitively balancing a blend of traditional with contemporary comfort are the collection of six designer room categories. Inspired and named after the members of the Rosselli family and symbols closely connected to them, each of the rooms enclosed within Rosselli is utterly unique. Reflecting the grandeur of the building and the era it was originally built, a sense of time is forgotten across each room and its style.
